### **Always keeping its balance**

#### **New application as luggage box**

The BITO multi-purpose container, series MB, conquers new markets: it is now available as mobile carrier. Traub Fahrzeugtechnik GmbH in Münzenberg offers the BITO MB sized 600 x 400 mm as luggage box for their tricycle Quix Balance.

The Quix Balance tricycle made by the Hessian manufacturer of bicycles and tricycles is a stable vehicle for private and industrial use, which offers a lot of loading space on the 505 x 335 mm carrier – and enough space for the multi-purpose container from BITO-Lagertechnik Bittmann GmbH. Traub offers the MB container in the dimensions 600 x 400 x 340 mm (outside dimensions on top, 505 x 335 mm at the base) with or without hinged lid and with a volume of up to 58 litres. Smooth inner walls ensure a 100% volume utilisation. Moreover, the container can be cleaned fast and easily. Due to the ergonomically formed and generously dimensioned handgrips the MB can be lifted conveniently onto the vehicle and put down again. The cyclist does not even need to worry during a rain shower: the hinged two-part lid keeps away water and soil.

“With this new application on the Quix Balance tricycle, we strike a new path”, says Peter Kerth, BITO product manager for plastic bins and containers. “The private and industrial use of our MB containers als luggage box proves the versatility of BITO multi-purpose containers.”
