

Press report

The BITO PRODUCT CATALOGUE 2007 is out – now featuring more products than ever

As scheduled for the start of the forthcoming “storage and materials handling season“, BITO Storage Systems has launched the new edition of the BITO product catalogue. Many new pages have been added to take account of the continuous success of the BITO range. For fast and easy orientation, the product range has been subdivided into six groups: shelving & racking, identification & safety, in-house transport, workstation systems, bins & containers and storage and order picking systems.

Many new additions have been made to the product range used for in-house transport such as container trolleys, table and shelf trolleys in many variations, swan neck trolleys, platform trucks, sack and board trucks as well as the practical pallet lift trucks for load capacities of up to 2500 kg. BITO offers a 5 year warranty on the in-house product range which speaks in favour of the range’s reliable workmanship.

The bin and container range has also been extended. In response to higher demands in the field of storage and transport, XL containers sized 800 x 600 mm are now available in two more heights – 420 and 520 mm. The large and robust stacking containers in Euro footprint come either with a standard base providing a load capacity of 60 kg or with a double base and a load capacity of 150 kg.

With all the new products and many additions to the well-proven product range, the BITO catalogue is as useful as ever for storage, order picking and materials handling – whatever the industry. Attractive offers are an additional incentive for having a look into the new catalogue. Benefit from easy ordering via our order hotline. Just dial 024 7638 8850 send a fax on 024 7638 8860 or write us an email on info@bito.co.uk . If you prefer to use our internet shop, have look at our website at www.bitco.co.uk which provides optimised product search and order functions.
