

Issue 04.05.09

Letter of confirmation in compliance with 2007/19/EG

- Food contact materials -
- Special colours/customised colours -

It is herewith confirmed that the bins and containers marked with the "food safety icon", manufactured by

BITO-Lagertechnik GmbH
Obertor 29
55590 Meisenheim

conform to the following directives:

2007/19/EG
2002/72/EG
1935/2004/EG
93/8/EWG

The raw materials used - PP + colour pigments - conform to the Regulations on Food Contact Material and Consumer Products and are approved by the BfR (Federal Institute for Risk Assessment) guidelines.

The special colours used in these formulations were not explicitly submitted to a migration test. However, they have been admitted by the BfR as - in accordance with the latest scientific findings - their migration potential is lower than the permissible critical value.

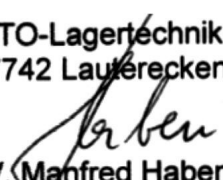

A complete copy of the migration test results may be requested anytime subject to a charge.

As a rule, the products in question are used in an ambient temperature range of -10°C to +70°C.

As it is not possible to test all customer specific formulations, it is the obligation of the users to check whether the overall migration behaviour meets their demands.

The combination of article designation which is injection-moulded into the product and manufacturing date ensures traceability.

BITO-Lagertechnik GmbH
67742 Lauterecken
